

HASLEMERE TOWN COUNCIL

Bandstand Proposal – Town Meadow

BACKGROUND

In September of last year Full Council resolved that the bandstand project be included on the agenda for the Full Council meeting scheduled for September 2026.

This is high level appendix has been produced to give an idea of costs involved in such a project. For comparison purposes, a couple of options at different price points have been considered and these are for supply and install, no foundations, which Broxap advised are 75-80% accurate. All prices subject to structural review and site survey, and include:

- Site surveying, manufacture of above components, delivery to Site (Including offloading)
- Plant equipment/Hire, HD Anchors (Post fixed solution)
- Installation (Normal working hours), Site left in a clean & tidy manner

Out of scope works for the purposes of costs are works by others or not considered at this time:

Foundations & making good, Asset/Surface protection, Crain Hire

- Scaffolding/edge protection,
- Attendances & amenities i.e. contractors compound & traffic/pedestrian management
- CCTV& lighting, Submissions to Building Control or Planning Authorities
- GI's or consideration to M&E or other service locations.

Option 1 Burslam Bandstand - £110k - £120k

Option 2 Isle of Wight Bandstand - £55k - £65k

<https://www.broxap.com/isle-of-wight-bandstand.html>

For a fuller idea of costs and project considerations, please visit the following link to Dorking Town Council who have recently installed a Bandstand: <https://www.dorkingbandstand.com/about-the-bandstand/> . Dorking's bandstand project cost around **£260,000** in total. In addition to the cost of the bandstand itself, this covered the plinth, the structure, erection, and initial funding for running and maintenance.

RECOMMENDED: Councillors are to consider whether to pursue this project and, if so, that it goes to the budget working party as a possible project for 2027-28.
